Next-to-skin climate control which transports body moisture from the skin to the fabrics outer surface through specialized moisture wicking yarns.

# ANTI-SNAG CONSTRUCTION

Achieved by using specialized yarns that are less likely to break or unravel when pulled or snagged by incorporating specific knitting techniques that reinforce the fabric and reduce the risk of snagging.

### **DWR WATER RESISTANCE**

A polymer coating added to outerwear to provide water resistant protection. This technology also prevents fabric from becoming weighed down by excess moisture.

# THE END OF GREENWASHING

#### TRANSPARENCY, TRACEABILITY, AND GENUINE SUSTAINABLE IMPACT

We believe true sustainability can only be achieved when there is transparency and traceability. Without genuine proof of the use of recycled materials in a product, all sustainability claims can be considered greenwashing. Our IMPACT and CHANGE collections aim to end greenwashing and lead our industry in a new direction.

## IMPACT THE POWER OF TRACEABILITY

All recycled content claims are validated with AWARE<sup>TM</sup> which unites a physical tracer with public blockchain technology for

SERIOUS SUSTAINABILITY

## DESIGN & SUSTAINABILITY

CHANGE Collection is all about design, sustainability & giving back. All recycled fabrics, plastics, and materials used in this collection are 100% certified by the Global Recycled Standard (GRS) and Recycled Claim Standard (RCS).

From each of these collections, 2-3% of sales are donated to water.org to help provide water-stressed communities with lifetime access to safe water & sanitation.

# RECYCLED PET FABRIC

# Giving Plastic a Second Life

PET is one of the most common plastics, widely used for bottles and packaging. Unfortunately, this also makes it a major contributor to global solid waste.

Recycled PET (RPET) offers a sustainable alternative. By reusing existing plastic instead of producing new resin, RPET reduces waste, lowers environmental impact, and gives discarded bottles a meaningful second life.

# Benefits of producing Recycled PET fabric over normal fabric:

- Saves Energy
- Reduce pollution (CO₂ emissions)
- Fabric is sturdy can produce Backpacks,
   Pouches, Laptop bags, Cooler bags.

We Stock Recycled PET fabric & can supply Bags / Pouches made from GRS certified RPET fabrics in our U.A.E. factory

# Sustainability and Transparency Organization and Certification

# **Global Recycled Standard (GRS)**

The Global Recycled Standard (GRS) is an international, voluntary, full product stnadard that tracks and verifies a product's recycled content, chain of custody, social and environmental impact and chemical restrictions.

The objective of the GRS is to define requirements to ensure accurate recycled content claims.

# **Recycled Claim Standard (RCS)**

The Recycled Claim Standard (RCS) is used as a chain of custody standard to track recycled raw materials through the supply chain.

The GRS/RCS logo ensures the materials used in the product are genuinely recycled.

# Forest Stewardship Council (FSC)

The Forest Stewardship Council (FSC) label is the world's most trusted mark for sustainable forestry. FSC's pioneering certification system, which now covers more than 200 million hectares of forest, enables businesses and consumers to choose wood, paper and other forest products made with materials that support responsible forestry.
